*"The people that enter a family program are courageous, determined, passionate, exhausted, and a little bit pissed off. But the reality is that they are strong human beings. And when we say they deserve the help - sometimes there can be resistance. Like, "excuse me, I'm doing just fine". Well you know what - you're doing amazing! However, could you be doing better? When you get still at night how still do you get? Are you able to sleep restfully? Do you still have joy in your life? Do you find supports? Do you feel alone? Where are you? If any of those resonate for you - this is your weekend. "*
